

TRAINING USA, INC.
WE TRAIN AMERICA

STORMWATER FUNDAMENTALS & INSPECTION

Safety & Certification Courses

Training USA, Inc. offers an interactive 1-day safety training course to provide students with an understanding about the requirements for erosion and sediment control for construction. Combining discussion, case studies and group exercises, students will learn about the various types of erosion and how to select and install best management practices to prevent erosion and control sediment on jobsites.

This course will also cover Storm Water Pollution Prevention Plans (SW3P), including the requirements needed to obtain a permit, routine inspection checklists, and proper maintenance necessary to ensure that Best Management Practices (BMPs) remain effective.

Training USA, Inc. offers the BEST *Stormwater Fundamentals & Inspection* courses in the industry. Our Stormwater training program is patterned precisely like the one approved by the Federal Highway Authority (FHWA) for nationwide certification as part of the Road Scholar Certification Program. **Train with the real experts, train with Training USA.**

Students will receive a Training Certificate!

Course Learning Outcomes

- Participants will be able to define, classify and explain the fundamental forms and functions of stormwater practices and their related maintenance needs.
- Participants will be able to identify, apply and analyze stormwater practices using visual inspection forms to define and implement a preliminary Stormwater Practices Maintenance Program.
- Participants will enhance their knowledge of the importance of stormwater practice maintenance, communication with stakeholders and resources available for effective outreach.

Course Content

- Various causes of erosion
- Effective erosion and sediment control practices
- Effects of stormwater runoff
- Stormwater regulatory framework – NPDES Permits, Rules & Regulations
- Fundamentals of stormwater practices maintenance: 5 key questions
- Basic steps in stormwater inspections
- Vegetated and biological stormwater practices maintenance
- Surface and in-ground stormwater practices maintenance
- Stormwater Pollution Prevention Plans (SWPPP or SW3P)
- Stormwater practices maintenance program and case studies
