

# FALL PROTECTION SAFETY

**Target Audience:** This course is designed specifically for DOT District employees, municipal public works, streets/roads, parks, water utility and/or other city or county employees who are exposed to fall protection/ladder usage work hazards and the risks associated with working from heights.

**Supervisors and Trainers:** Also recommended for division supervisors, agency safety officers, department safety coordinators, and equipment trainers.

**Additional applications would be** as an orientation for new employees and a good refresher for team members.

**This 4-hour course provides** practical application of fall protection equipment and methods for each client's specific scopes of work. Included among the learning objectives:

- How to avoid falls through application of proper fall protection systems
- How to safely use ladders
- How to safely use aerial reach & bucket truck equipment
- How to protect work crews while climbing other objects
- Securing crew safety while performing work at elevated destinations
- Application of the agency's own fall protection policies to employee work activities

Students will receive a Training Certificate!
