

BASIC DRIVER SAFETY

Virtual or In-Person Safety Training Course

Target Audience: This 2-hour course is designed specifically for government agency employees, department managers, agency safety officers, human resource and risk management personnel, and field supervisors.

Additional applications would be as an orientation for new employees and a good refresher for team members.

This course provides practical application of vehicle and driver safety, incorporating any agency-unique policies and procedures in the training. Included among the learning objectives:

- Key points of your agency's PPM, if applicable
- Basic vehicle safety, including backing, how to handle accidents, driving on interstates and highways, and more
- Basic driver safety, including unsafe behaviors and driving hazards (intersections, roundabouts, barricades, aggressive driving, distracted driving, rain/weather, driving impairments)
- Key state and local statutes
- Summary of defensive driving basics and five keys to safe driving

This training course is available on-site or virtually via instructor-led Zoom session.
