

Municipal Vehicle Driver Safety

Target Audience: This full-day course is recommended for government agency field workers and supervisors who drive larger agency vehicles where a commercial driver's license is not required but a higher level of driving skills is needed.

Additional applications would be as an orientation for new employees and a good refresher for experienced team members.

This course provides practical application of larger vehicle operations and driver safety, incorporating any agency-unique policies and procedures in the training. Included among the learning objectives:

- Key points of *your* agency's PPM, if applicable
- Basic large vehicle safety, including backing, how to handle accidents, driving on interstates and highways, municipal route safety and more
- Basic large vehicle safety, including basic maneuvering, unsafe behaviors and driving hazards (intersections, roundabouts, barricades, aggressive driving, distracted driving, rain/weather, driving impairments)
- Key state and local statutes
- Summary of defensive driving basics and five keys to safe driving.
- Hands-on activities include vehicle backing, navigating tight turns, proper connecting & towing of a trailer, vehicle inspection and working with spotters.
