

Winter Road Maintenance & Snow Operations

Full Day Training Workshop (Virtual or In-Person)

Training USA, Inc. invites road supervisors, superintendents, public works and maintenance personnel, equipment operators, and city/town managers to a full-day workshop covering all aspects of winter road maintenance operations.

This newly updated course covers a wide range of topics critical for anyone responsible for winter road maintenance and snow operations including:

- DOT & Public Works snow fighting policies and strategies
- Course is updated annually and customized by state/region
- The appropriate snow/ice control equipment and techniques for proper treatment of road surfaces under varied conditions
- *Best Practices* used by DOT and local municipalities for snow operations
- Distinguishing between safe and unsafe practices during snow operations
- Off-Season Planning / Organizing / Preparations / Maintenance
- Anti-Icing and De-Icing: strategies, techniques, and materials ~ how and when to use them based on different road temperatures and conditions
- Snow and Ice Control: strategies, techniques, and procedures
- Snow Fighting Equipment: what is being used, when to use it, and how to use it safely and effectively

In addition to individual and group exercises and discussions, each participant will receive valuable handouts and reference materials they can take home with them for future reference.
