

HAZARDOUS CHEMICAL SAFETY

Half-Day Virtual/Online Training

Target Audience: This course is designed specifically for DOT, municipal public works, streets/roads, parks, water utility and/or other city, county or tribal employees who are occupationally exposed to hazardous chemicals.

Supervisors and Trainers: Also recommended for division supervisors, agency safety officers, department safety coordinators, and agency chemical safety trainers.

Additional applications would be as an orientation for new employees and a good refresher for team members.

Course Overview: This ½ day virtual course provides basic information concerning the OSHA HAZCOM program and hazardous chemicals. This training program's purpose is to ensure that workers who are occupationally exposed to hazardous chemicals understand the hazards of the chemicals with which they work and learn how to minimize these hazards.

While each course can be tailored to the needs of the client, typical information covered in this course can include the following elements of *Hazardous Chemical Safety*:

- Employee and Employer Responsibilities
- General Information and Hazards
- Information Found in *Safety Data Sheets* (SDS's, also MSDS's)
- Definition and Purpose of the *Authorized Use List* (AUL)
- Chemical Inventorying
- Labeling and Signage
- Design & Inspection of Facilities for Storage, Transmission and Worksite Safety Engineering
- Receiving, Transportation and Security
- PPE and Protective Clothing
- Common Contact Points
- Emergency Response: Minor Spills, Major Spills, Chemical Releases, Product Recovery
- Natural Disaster Issues
- Training, Procedure, and Inspection Recommendations
- Case Studies

Students will receive a Training Certificate!
