

Welcome, 2026!

Winter has been a busy and exciting season for Training USA! We offered a packed lineup of hands-on safety and operations classes, from Aerial Reach Equipment and Bucket Truck Operation & Safety to Fall Protection, Lock-Out/Tag-Out, Plan Reading for Roadway Maintenance, Gradall Operations & Safety, Motor Grader, and Chemical Safety training – with sessions spanning from Florida to Alaska!

Expanding Our Reach

Training USA has been in the process of scheduling safety training (both in-person and virtual) with several new agencies including Louisiana, Massachusetts, Texas, Vermont, Georgia, North Carolina, Nevada, New Hampshire, North Dakota, and Wisconsin. More teams across the country are gaining essential skills and certifications – and we're thrilled to see our learner community grow!

Seasonal Safety Trainings for All Regions

Over the past year, we delivered 30+ seasonal safety training classes nationwide, covering *Winter Road Maintenance & Snow Ops* and *Storm Preparation & Recovery Ops*. As spring tornado and summer hurricane seasons approach, these trainings help agencies prepare crews for post-storm hazards, inspections, debris removal, and recovery work, all while reinforcing safe practices that reduce risk and keep teams ready when it matters most.
