

Conventions, New Trainings, and New Locations

Spring came in like a lion for all of us here at Training USA and summer looks like more of the same! We attended the Western LTAP & TTAP conference in Boise, Idaho, and Tony was a guest speaker at the South Central Regional LTAP conference in Arkansas.

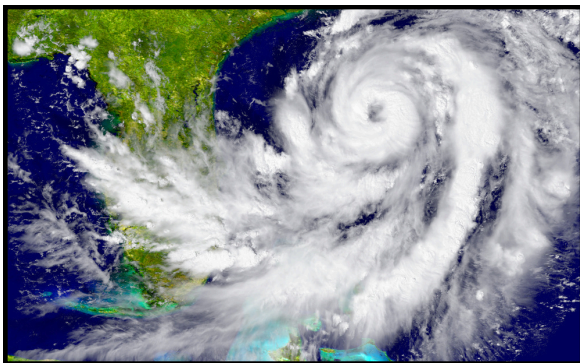

And as always, we will once again be a **Silver Sponsor for the NLTAPA convention in Kentucky in July**. Please stop by our booth to say hello!

New Hurricane Season Checklists

Hurricane season is here, and preparation is the best defense. We have added **region-specific checklists** to our [Free Resources webpage](#) for the following regions:

- [Miami-Dade](#)
- [Palm Beach](#)
- [Gulf Coast / Southeast](#)

Our **Hurricane Preparedness Checklists** cover the essentials — from emergency planning and disaster supply kits to flood safety, insurance reviews, and protecting important documents. Taking a few steps today can help keep your family, home, and business safer when severe weather strikes. You can view our new region-specific checklists by clicking on the links above.

Featured Trainings

Welding Basic Training (2-Day)

Training USA is always adding new training courses, and we were excited to hold our first 2-Day **Welding Basics** training event this spring. Trainer Todd Zech provided a combination of classwork and hands-on training that included a consideration of OSHA Welding Standards, basics of PPE and welding equipment, preparing and maintaining a safe work environment, and the fundamentals of welding materials, joints, and environmental considerations.

Does your crew need welding training? Take a look at our [Welding Basics course outline](#) and give us a call for more details.

Amphibious Vehicle Training (2-Day)

The removal of invasive aquatic weeds in wastewater retention ponds and swamps requires its own specific type of equipment. Whether it's a WeeDoo or a Berky, environmental workboats have their own unique operational and safety factors that our new **Aquatic Weed Cutters/Workboat Operation & Safety** course addresses, along with general boating safety guidelines. Take a look at [the course outline](#) for this 2-day course and give us a call!
